# INTRODUCTION

The Unified Planning Work Program (UPWP) is a description of the annual program for a continuing, cooperative and comprehensive (3C) transportation planning process in the Berkshire region. As staff to the Berkshire Metropolitan Planning Organization (MPO), the Berkshire Regional Planning Commission (BRPC) is responsible for developing the UPWP in cooperation with the MPO and staff of member transportation agencies including the Berkshire Regional Transit Authority (BRTA) and Massachusetts Department of Transportation (MassDOT).

The UPWP provides an indication of regional long and short-range transportation planning objectives, the budget necessary to sustain the overall planning effort, and the sources of funding for each specific program element. All tasks will be performed by BRPC in cooperation with appropriate agencies including BRTA. The only exception is task 2.3, Traffic Data Collection which will be performed by a consultant. Amendment 1 allocates \$35,000 of funding for professional services to conduct a Rail Corridor Capacity Analysis.

The work tasks within this UPWP reflect issues and concerns from transportation agencies at the federal, state and local levels. The UPWP continues BRPCs emphasis on tasks leading to implementation of transportation improvements. Several tasks are specifically targeted to implement recommendations of the *Regional Transportation Plan* and provisions of federal legislation, particularly *Fixing America's Surface Transportation* (FAST) Act (Public Law No. 114-94), the Clean Air Act Amendments of 1990 (CAAA), the Americans with Disabilities Act (ADA), and the Civil Rights Act of 1964.

#### This UPWP will focus on the following:

- Management of the 3C Process and TIP Development
- Preparation of a new TIP and prioritization of new projects
- Corridor access and land use management for communities
- Continued investment in transportation software and professional development.
- Safety as a major consideration for all travel modes
- Maintenance of the Pavement Management System.
- Annual Title VI reporting
- Support for bicycling and pedestrian travel and implementing Complete Streets initiatives
- Improving the accuracy and scope of data used in transportation planning, including traffic volumes, crash data, land development and major businesses
- Transportation technical assistance to local governments
- Travel Demand Model Updates
- Performance based planning and performance measures
- Additional tasks subject to available funding and staff resources
- Increased use of clean, alternative transportation modes
- Strategies to reduce GHG emissions

#### BERKSHIRE METROPOLITAN PLANNING ORGANIZATION 2020 UNIFIED PLANNING WORK PROGRAM

The Federal Highway Administration (FHWA) continues to recognize the importance of the UPWP to address ten planning factors, specifically during the development of the UPWP:

- 1 Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- 2 Increase the safety of the transportation system for motorized and non-motorized users;
- 3 Increase the security of the transportation system for motorized and non-motorized users;
- 4 Increase the accessibility and mobility options available to people and for freight;
- 5 Protect and enhance the environment, promote energy conservation, and improve quality of life;
- 6 Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- 7 Promote efficient system management and operation;
- 8 Emphasize the preservation of the existing transportation system;
- 9 Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
- 10 Enhance travel and tourism.

This UPWP addresses the above ten Planning Factors in a variety of ways, the sum of which is comprehensive. The manner in which each planning task/activity applies to the factor is depicted in the table below.

#### BERKSHIRE METROPOLITAN PLANNING ORGANIZATION 2020 UNIFIED PLANNING WORK PROGRAM

In addition to the FHWAs ten Planning Factors, tasks within the UPWP address the Planning Emphasis Areas of FAST Implementation by transitioning to performance based planning and programing; Regional Models of Cooperation by re-thinking traditional approaches, coordinating with stakeholders adjacent to the region including transit providers and furthering Ladder of Opportunity by identifying transportation connectivity gaps.

The descriptions of the tasks to be accomplished and the budgets for these tasks are based on the best estimate of what can be accomplished within the limits of available resources. If, in the performance of this work program, it becomes apparent that certain tasks cannot be accomplished due to changing or unforeseen circumstances, the UPWP will be adjusted by redefining the scope of the tasks and/or reallocating funds among tasks. Such adjustments will be made in cooperation with MassDOT, the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), the Berkshire Regional Transit Authority (BRTA), and other concerned agencies.

# TRANSPORTATION PLANNING FUNDING SOURCES

*Federal Highway Administration (FHWA)/MassDOT* -MassDOT receives funds from several FHWA programs that are passed through to planning agencies to conduct transportation planning activities. Those programs include Metropolitan Planning (PL), Statewide Planning and Research (SPR), Scenic Byways, High Priority Projects (HPP), Transportation, Community and System Preservation (TCSP) and earmarked appropriations. The first two categories are specifically intended for planning. Funding from those programs is apportioned to states on the basis of population in urbanized areas and relative to the amount of highway construction funds the state receives. MassDOT maintains multi-year contracts with regional planning agencies to conduct transportation related planning activities utilizing the PL and SPR funds received from FHWA. The other programs mentioned above are not exclusively for planning but may be used for that purpose.

Within the Berkshire region the predominant source of funding is a combination of federal (PL) and state funds. These funds are allocated to regional planning agencies in the state, using a formula agreed to by the affected agencies. Funds must be spent within the year allocated. Any unspent funds will be de-obligated at the end of each federal fiscal year. The decision to re-obligate unused PL funding is at the discretion of the State. For federal fiscal year 2020, the Berkshire region's PL allocation is \$573,844. The UPWP meets FHWA's requirement that at least 33% of PL funds result in tangible products.

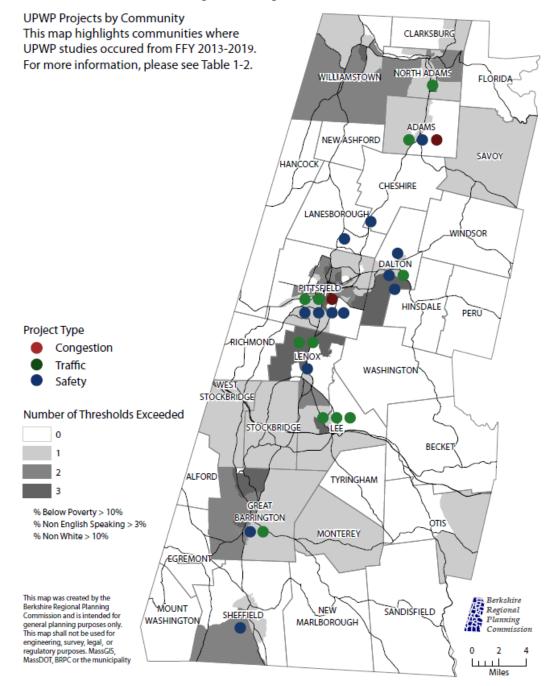

*Federal Transit Administration (FTA)/MassDOT/BRTA* -Two types of funds are available for transit planning in the Berkshire region. Section 5303 and Section 5307. Section 5303 funds are designated for the use of planning and technical studies related to urban mass transportation. They are passed from FTA through MassDOT to the regional planning agencies in the state. This FFY 2020 UPWP will be funded by a combined PL/5303 contract which will be administered by the FHWA and the match for 5303 funding will be provided by MassDOT.

Section 5307 funds can be used for planning as well as other purposes, and are distributed by FTA on the basis of each transit authority's service area population. However, because the amount allocated to the BRTA is just enough to cover the capital and operating needs of that agency, it has opted not to use any of those funds for planning. Therefore, no Section 5307 planning work is included in this UPWP. The time periods, or "program years", for the various funding sources are outlined in the following chart:

Funding Source:	Fiscal Period:
FHWA(PL)/MassDOT	October 2019 through September 2020
FTA/MASSDOT 5303	October 2019 through September 2020

# GEOGRAPHICAL DISTRIBUTION OF UPWP FUNDED STUDIES

BRPC has staff conducted a geographical distribution of transportation planning tasks/studies completed in connection within the UPWPs spanning the last five years. This assessment is similar to that utilized in the TIP to identify projects that potentially impact minority and low-income block groups in the region and will influence future work. The map below depicts the studies/task in relation to these areas.

#### BERKSHIRE METROPOLITAN PLANNING ORGANIZATION 2020 UNIFIED PLANNING WORK PROGRAM

In performing this assessment, UPWPs from the past five years were reviewed to identify the transportation planning tasks which were undertaken and completed in the Berkshire MPO region. In addition to these major planning efforts, other activities such as data collection, local technical assistance requests and regional activities including the preparation of the Transportation Improvement Plan (TIP) and the Coordinated Human Services Transportation Plan were conducted as UPWP work tasks. While it may appear that many of the studies may be focused on a select number of communities, all of the study efforts benefit each resident who travels to and within the urbanized area of Berkshire County. There has not been any instances where a community requesting assistance with a transportation issue has been denied help.

# UPWP ADMINISTRATIVE ADJUSTMENTS AND AMENDMENTS

During the course of the year, there may be instances when a change to the Unified Planning Work Program (UPWP) is necessary. These changes can range from minor to major. The following section has been developed to outline the process that will be followed to effectuate changes to the UPWP. Changes which are relatively minor in nature will be handled as Administrative Adjustments; modifications which are more significant will be handled as an amendment. Below are general guidelines regarding the conditions that constitute an administrative adjustment or amendment to the UPWP. All proposed administrative adjustments must be presented to the MPO for consultation. Both adjustments and amendments must be voted on by the MPO members; amendments must be released for 21-Day public comment period prior to endorsement.

UPWP Administrative Adjustment	UPWP Amendment
Reallocation of budget funds	Addition or Removal of UPWP task(s)
Change in start/completion dates within the originally intended federal fiscal year(s)	Change in start/completion dates, outside of originally intended federal fiscal year(s)
Adjustment to project scope	Significant change in project scope, cost, and/or time allocation

#### Submission of Budget Reallocation Request

Following MPO endorsement of the adjustment or amendment, a Budget Reallocation Request form will be prepared and submitted to MassDOT Office of Transportation Planning (OTP). All fields of the form will be filled out with clear indication that the MPO was consulted prior to submission. Back up documentation will be submitted, including the UPWP description of the task(s) affected, original budget, revised budget, and justification for the request. MassDOT is strongly encouraged to provide final approval in an expeditious manner.

#### **Definition of Significant Change:**

With respect to an amendment to the UPWP attributed to a significant change, it is considered significant when it alters the original intent of the project or intended conclusions of the project. It may also entail a change to the project scope, budget, project schedule and time allocation.

Comments:

- No listing of all possible projects with ratings on how the proposed projects were selected.
- Who selected the projects to be included?
- Should the list of all projects be made public and let the public and have the public cast votes on priorities?
- The Unified Planning Work Program (UPWP) Activities does not specify who is responsible to do the activities.
- There are many targets that are stated as "increase", " reduction" or "qualitative". How can these objectives be qualitatively evaluated?

Commenting on the 2020 RTP and UPWP:

Passenger rail in Berkshire County and across Massachusetts is an absolute must. Having a passenger service on the Housatonic Line between NYC and Pittsfield, as well as an upgraded and more reliable East/West service from Boston to Pittsfield will provide easy access for commuters and vacationers alike, and will also provide easy intra-county travel. Traveling by rail is objectively the most efficient form of travel, surpassing all other modes by a long shot. Having an efficient form of travel, critical.

Substantially more funding should also be acquired to electrify freight and passenger rail on the Housatonic Line, and the East/West line, as well as creating the infrastructure necessary for electric vehicles within Berkshire County. Electricity can be sourced by renewable energy, making traveling by rail or electric vehicle exponentially more efficient. Twelve years from now, our planet will be past the point of no return when it it comes to climate change, unless we drastically make a change in terms of our energy and travel habits NOW. This should be of utmost priority.
